**Capabilities & Core Competencies**

Guardian Environmental Technologies delivers efficient and cost-effective oil and chemical spill response products to customers worldwide. Our buying power and low overhead allows us to give the most competitive pricing and our years of experience in industrial supply make us keenly aware of the integral nature of supply-chain operations and objectives.

Our unique proprietary non-leaching, low volumetric solidifying polymers are used worldwide for both oil and hazardous reactive chemical spill response. Our proprietary products are packaged in standard sizes. We pride ourselves on our ability to customize our propriety products to meet those needs. Low overhead and efficient facilities permits us to be extremely price competitive on both standard sized and customized products.

As a manufacturer we have production facilities located in Connecticut, Ohio and Texas we offer a wide variety of environmental products including sorbents, containment, hazardous chemical solidifying absorbents in addition to bulk solidification products. These products generally fall under the Federal Supply Code of 4235.

As a reseller and distributor, we supply a variety of U.S. manufactured oil, hazmat and universal absorbent and containment products to industry and government entities.

**Example Product Classifications**

**FSC Codes:** 4235  
**NAICS** 325998, 325612  
**SIC:** 4959, 2899, 2842, 2297  
**SIN:** 375-99, 375-351, 375-352, 375-353, 375-355  
**Others**

**Niche**

Guardian Environmental Technologies markets its products to various targeted industries that manufacture or use in their production process hazardous hydrocarbon based chemicals, including reactive chemicals. The company also markets to industries that use or produce petroleum-based products. Our products are primarily used for emergency spill response, clean up of spills and solidification of industrial sludges. The products are also very useful in certain phases of production maintenance.

**Value Proposition: chemical & oil spills**

Cost savings are achieved through superior quality products resulting in efficiency, reduced man-hours and expanded disposal options.

**Example Past Performance**

Momentive Technologies, Tronox, Honeywell International, MEMC, GE Transportation, TIWEST Joint Venture, MEMC Electronics, Degussa, WL Gore, BASF Corporation, Cristal Metals, Dupont US Government: DoD, National Park Service,

**Management Team**

President: William Litwin  
Vice President: Patricia Garland  
European Sales Manager: James Urquhart

**Technical Expertise**

Our expertise comes from over 20 years of developmental and field experience. The company holds a patent relating to polymeric absorption applications. Our capabilities enable us to evaluate a need and recommend a solution.
